Siddhi Hirpara

Software Engineer

Ahmedabad, Gujarat | +91 8320190035| siddhihirpara24@gmail.com | LinkedIn | GitHub

SUMMARY

Computer Applications postgraduate with hands-on experience engineering full-stack web applications using **Java, Spring Boot, React.js, Python**, and relational databases (**PostgreSQL/MySQL**). Skilled in designing responsive **user interfaces**, secure **RESTful APIs**, backend microservices, and database-driven architectures. Familiar with in **AWS (EC2, S3, IAM), Docker, Git, CI/CD automation**, containerization, and modern **DevOps** practices. Passionate about writing clean, maintainable code and delivering scalable software solutions.

SKILLS

Languages: Java, Python, SQL, JavaScript, C, HTML5, CSS3
Frontend: React.js, React Router, Axios, Bootstrap, Tailwind CSS, Responsive Web Design
Backend: Spring Boot 3, Spring MVC, Spring Security 6, Spring Data JPA, Hibernate, RESTful APIs, FastAPI
Security & Development: RESTful APIs, JWT, Authentication & Authorization (RBAC), BCrypt, Postman
Databases: MySQL, PostgreSQL, MongoDB, Relational Database Design
Cloud & DevOps: AWS (EC2, S3, IAM, VPC), Docker, Docker Compose, Terraform, GitHub Actions, Jenkins, CI/CD Pipelines, Linux
Tools & Version Control: Git, GitHub, Maven, Postman, IntelliJ IDEA, VS Code, Spring Tool Suite (STS), Nginx

PROJECTS

Smart Internship Portal | React.js | Java | Spring Boot | REST APIs | PostgreSQL | Git (Link)

- Developed a **full-stack web application** to manage campus internship activities, allowing students to register, view opportunities, apply, and track application status.
- Built a **ReactJS frontend** and developed **Spring Boot REST APIs** to manage students, companies, internships, and applications.
- Implemented **CRUD operations and PostgreSQL database integration** for storing and managing student, internship, and application data.
- Created a **faculty/admin module** to view student details, manage applications, update application status, and track internship progress.

DocuVault – Personal Document Organizer | React.js | Spring Boot | Spring Security | JWT| REST APIs | MySQL (Link)

- Developed a full-stack personal document organizer web application, allowing users to securely upload, categorize, view, search, and download personal document.
- Implemented stateless **JWT authentication** and **RBAC** with Spring Security and **BCrypt** for strict data privacy.
- Developed **RESTful APIs** supporting file uploads (up to 10MB) with MIME validation and in-browser preview streaming.
- Designed **MySQL** database schemas using **Spring Data JPA** and **Hibernate** for fast category filtering and search queries.
- Built an interactive Admin Dashboard with Chart.js analytics, user account moderation, and CSV audit report exports.

Multi-Stage CI/CD & AWS deployment | AWS | Terraform | Docker | GitHub Actions | Jenkins | Linux | Nginx (Link)

- Automated cloud infrastructure provisioning on AWS using **Terraform (IaC)**, setting up **EC2 instances**, **VPCs**, and **Security Groups** for production-grade hosting.
- Containerized multi-tier frontend, backend, and database services using **Docker** and **Docker Compose** to achieve consistent cross-environment parity.
- Constructed automated **GitHub Actions CI/CD pipelines** to run Maven tests, build container images, and execute seamless remote deployments to **AWS EC2** via **Nginx** reverse proxy.
- Utilized Linux and Bash scripting to automate server maintenance, log rotation, and deployment checks.

EDUCATION

Master of Computer Application 2022-2025
Sardar Vallabhbhai Global University Ahmedabad
SEM 1 – CGPA: 9.02 | SEM 2 – CGPA: 9.14

Bachelor of Computer Application 2025-2027
SSMT. K. S. N. Kansagra Mahila College Rajkot
CGPA: 7.79

CERTIFICATIONS

- The Linux Foundation – Developing Secure Software Certificate
- AWS Cloud Practitioner Essential – AWS Certificate
- Cybersecurity Analyst Job Simulation – TATA Certificate
- Launch an auto-scaling AWS EC2 virtual machine – Coursera Certificate
